

AHMED HASEEN

Data Analyst

☎ +94-767502206 ✉ mh.ahmedhaseen.ai@gmail.com 🌐 Ahmed Haseen 🔄 AhmedHaseen 🌐 AhmedHaseen.com

Professional Summary

Motivated Data Analyst and aspiring Data Scientist with a strong foundation in SQL, Python (Pandas, NumPy), Excel, and Power BI. Experienced in data cleaning, analysis, and dashboard development through real-world projects. Currently expanding skills in machine learning and predictive analytics. Proven ability to transform raw data into actionable insights to support data-driven decision-making, complemented by strong leadership and teamwork skills.

Skills

Programming & Querying: Python , SQL

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Power BI, Tableau, Advanced MS Excel

Data Analytics Techniques: Data Cleaning, Exploratory Data Analysis (EDA), Feature Engineering, Insight Generation, Descriptive Statistics

Machine Learning (In Progress): Scikit-learn, Supervised Learning (Classification, Regression), Model Evaluation

Web Scraping: BeautifulSoup, Requests

Cloud & Tools: Microsoft Azure, Git, GitHub, VS Code, Jupyter Notebook

Projects

End-to-End Telecom Customer Churn Analysis(Ongoing) | SQL, Power BI, Python 🔄 **April 2026 – Present**

- Building an end-to-end churn analytics solution for the telecom sector, covering ETL, interactive dashboards, and machine learning-based churn prediction using SQL Server, Power BI, and Python.
- Designed and implemented ETL workflows in SQL Server, including data cleaning, staging tables, and optimized views for structured analysis.
- Built interactive Power BI dashboards with advanced DAX measures, KPIs, slicers, and custom tooltip pages to visualize churn trends, customer demographics, and service usage patterns with a professional design.
- Developing a Random Forest classification model in Python to predict churn probability and identify high-risk customers.
- Planning integration of machine learning outputs into Power BI for predictive analytics and retention strategy support.
- Conducting ongoing analysis to identify key churn drivers across customer demographics, service usage, and contract types to inform targeted retention strategies.

SQL Data Cleaning & Exploratory Data Analysis - Global Layoffs Dataset | MySQL 🔄 **March 2026**

- Cleaned and preprocessed a real-world layoffs dataset by handling missing values, removing duplicates, and standardizing inconsistent data using SQL.
- Performed exploratory data analysis (EDA) to identify patterns in global layoffs across industries, companies, and time periods.
- Utilized advanced SQL techniques including Common Table Expressions (CTEs), window functions, and ranking functions (DENSE_RANK) for deeper analysis.
- Analyzed layoffs distribution across sectors, identifying Consumer and Retail industries as the most affected.
- Extracted insights from large-scale structured data to support data-driven business understanding.

Data Careers: Trends & Insights Dashboard | Power BI 🔄 **March 2026 – April 2026**

- Built an interactive Power BI dashboard analyzing survey data from 630+ global data professionals to uncover insights on salary trends, job roles, skills, and satisfaction levels.
- Performed data cleaning, transformation, and preprocessing using Power Query to ensure data consistency and accuracy.
- Developed DAX measures to compute key KPIs such as average salary, satisfaction scores, and demographic breakdowns.
- Implemented slicers and filters (gender, education level) for dynamic and user-driven analysis.

- Identified key insights including highest-paying role (Data Scientist ~ \$93K), low salary satisfaction (4.27/10), and Python as the most used language.
- Bike Sales Analysis Dashboard** | *Microsoft Excel* 

March 2026
- Developed an interactive Excel dashboard to analyze bike sales by transforming raw data into an analysis-ready format.
 - Performed data cleaning by removing duplicates, fixing inconsistencies, and standardizing datasets.
 - Created feature engineering logic using IF functions to categorize customers into age groups.
 - Built Pivot Tables to analyze customer demographics, income distribution, and purchase behavior.
 - Designed an interactive dashboard using slicers for dynamic filtering and insights exploration.
 - Identified key insights including income differences, age-based trends, and occupation-based purchasing patterns.

Education

BSc (Hons) in Software Engineering (Reading)	2023 – Present
<i>Faculty of Computing, Sabaragamuwa University of Sri Lanka</i>	<i>GPA: 3.64 / 4.00 (Current)</i>

Certifications

- **What is Data Science? – Coursera | IBM** View Certificate
Gained foundational understanding of data science, its real-world importance, and various career pathways in the field.
- **Fast-Track Data Analysis and Presentations – Coursera | Google** View Certificate
Applied AI prompting frameworks to extract data insights, fix spreadsheet formulas, explore data visualization, and enhance presentation skills.
- **Speed Up Data Analysis and Presentation Building – Coursera | Google** View Certificate
Leveraged generative AI tools and responsible prompting practices to accelerate data analysis workflows and visualization tasks.
- **Marketing Analytics: Data Predictions and Dashboards – Coursera** View Certificate
Analyzed marketing data to extract actionable insights, build predictive models, and develop data-driven dashboards.

Achievements

- **Bronze Medalist – Taekwondo | SLUG Games 2025**
Represented Sabaragamuwa University of Sri Lanka at the inter-university games.
- **Black Belt 2nd Dan (Nidan) – Karate | Sri Lanka Karate Federation (SLKF)**
Certified at advanced black belt level by the national governing body for karate in Sri Lanka.
